

Ergonomics and Work Related Musculoskeletal Disorders in Sonography

Course Description

This Philips Clinical Education full-day course for sonographers, lab directors and managers is developed to meet the climbing need to educate the ultrasound community on the risks and implications of work-related musculoskeletal disorders. Attendees will review: causes and risk factors for injury in sonography, the most common injuries and corresponding treatments, preventative workflow and workspace measures, therapeutic exercises and stretches, and the economic impact of work-related musculoskeletal injury on the sonographer and the hospital/facility.

Course Objectives

Upon completion of this program, attendees will be able to:

- Identify the risk factors for WRMSDs as pertaining to sonography
- Identify the symptoms associated with WRMSDs
- Demonstrate the proper way to set up your workstation and align your posture during scanning to help reduce your risk of injury
- Explain the importance of protecting yourself against injury
- Perform important exercises that can help keep you healthy and able to work
- Explain the direct and indirect economic impact of injury

Make the most of your investment with education

In today's competitive and dynamic healthcare climate, it is critical to use your medical imaging systems to their fullest potential. Our goal at Philips Healthcare is to provide the clinical education you need to make the most of your equipment investment.
