

Developing a Mindset for Innovation and Design Thinking

Growth Through Learning

In today's competitive and dynamic healthcare climate, it is critical to develop leadership skills to help team members reach their full potential. Our goal at Philips Healthcare is to train tomorrow's healthcare leaders today and provide support across all levels of the healthcare continuum.

Philips Leadership Excellence - PLE153

You can only get so far doing the same thing over and over again. Reaching that higher level requires innovation - doing something new that you've never done before. To begin, it requires a change of mindset, where you are seeking to grow through innovation in your work and life. This workshop focuses on the individual as both an innovator and leader. We're here to guide you toward that higher level of thinking and innovation that individuals and companies everywhere need to succeed in our era of accelerating change.

Developing a Mindset for Innovation and Design Thinking (PLE153)

Course objectives.

Upon completion of this course, the participant will increase their ability to:

- Reorganize yourself at a higher level toward innovation. Take action – learn and do something new that will have a positive impact for you and others.
- Build the habit of doing many small, new and different innovative things. Strive for bigger breakthroughs that you strategically planned by innovating step-by-step.
- Gain courage to do the things you should do that you may not have done. Leverage technology and adopt new trends and resources at a faster rate.
- Find your story and history as an innovator. Strategize to do more and continue to grow your story.
- Develop your growth mindset and help others to do so as well, as a leader.

Participants Receive

• Access to online tutorials, guides and workshops to keep using the methods, frameworks, and tools needed for your career.

Faculty

Innovation Training Facilitator
Philips clinical service specialist
