Clinical Education

Philips ClearVue 850 Basic System Training

Our goal at Philips Healthcare is to provide the clinical education you need to make the most of your equipment investment.

This elearning curriculum discusses the hardware, software and general usage of the ClearVue 850 Ultrasound system. You will explore the main components of the cart and control panel, familiarize yourself with the compatible transducers and associated clinical applications, review peripheral setup and the steps in performing a routine exam. Learners will also explore the protocol feature and learn how to review, report and export exams.

Buy the **Philips ClearVue 850 Basic System Training Curriculum** or purchase any of the 3 modules separately.

- System Overview, Transducers and Peripherals Setups
- Performing a Study and Exam Protocol
- Annotations and Body Markers; Review, Report and Export

These ASRT-accredited modules are self-paced tutorials consisting of enlightening content and colorful images.
